

SAMUEL AARON MARTI

Princeton, NJ | Willing to relocate to Somerville / Boston | Available on-site full time | U.S. work authorized
(609) 786-0369 | samuel.a@marti.to | [linkedin.com/in/saaama](https://www.linkedin.com/in/saaama)

Senior Full-Stack Engineer | TypeScript, React & Industrial Edge Systems

Full-stack engineer with **10+ years writing software** across production web products and industrial systems. Built and operated a React, TypeScript, and Node.js product end to end; previously delivered connected-machine software, edge tools, and factory pilots used around physical equipment.

10+ years

writing production software

Full-stack product

React, TypeScript & Node.js

12 live machines

edge and factory integrations

30 projects

production and OT delivery

EXPERIENCE

2024 – 2026

Lead Developer (Co-Founder)

PULSE GmbH | pulse-football.com | Princeton, NJ / Remote

- Built and operated a production product with Next.js, React, TypeScript, Node.js REST APIs, PocketBase, Docker, and AWS S3 across customer-facing and administrative workflows.
- Architected schemas, data models, APIs, admin tools, and real-time workflows supporting approximately **28,000 user-triggered application events per day**.
- Owned daily releases, Grafana monitoring, defect investigation, data recovery, and production support for the Linux-based, self-hosted platform.
- Redesigned onboarding through instrumentation, A/B testing, pixel-level UI refinement, and user feedback; first-lineup completion increased **236%**.

2023 – 2024

Co-Founder & Product Lead

HABINUM | Brig, Switzerland

- Built a 0-to-1 real-estate analytics MVP with PHP, MySQL, Python, JavaScript, and map-based data workflows.

2020 – 2024

Sr. Automation Engineer

Lonza | Visp, Switzerland

- Led approximately **30 automation and OT/IT projects** in production from requirements and risk assessment through implementation, commissioning, handover, and support.
- Built a controlled versioning and deployment framework with Angular, C#, ASP.NET, Git, test evidence, release notes, and rollback steps; automated updates for more than **150 PLCs**.
- Combined software, electrical, and operational work across PLCs, sensors, access control, alarm management, and production-support systems.

Industry 4.0 / IIoT R&D Lead

2017 – 2020

Eaton European Innovation Center | Roztoky, Czech Republic

- Led **5 engineers and 2 interns** building industrial edge products including OPC UA gateways, data collectors, MQTT tooling, programmable I/O, and automation devices.
- Visited production plants and translated operator and installer constraints into product roadmaps, guided setup workflows, prototypes, and pilots across **3 factories**.
- Retrofitted approximately **12 live machines** with physical I/O connectivity and digital twins, supplying operational data to MES and scheduling systems.
- Built a browser-based ladder application, Python compiler, and embedded C interpreter for an industrial I/O prototype; validated cyclic input-logic-output execution on the device.

Software Validation Engineer

2014 – 2017

Eaton European Innovation Center | Roztoky, Czech Republic

- Built automated tests, traceable procedures, and browser-based reports for PLCs, HMIs, desktop tools, industrial protocols, and web UIs using C#, Python, C, JavaScript, and CSS.

EDUCATION

M.S. Computer Science

Expected 2026

Georgia Institute of Technology, OMSCS

Selected coursework: Database Systems, Human-Computer Interaction, Software Development Process, Artificial Intelligence.

B.Sc. Computing

2018 – 2019

Teesside University

First class honours

HND Computing & Systems

2016 – 2018

Prague College

Distinction

Elektroniker EFZ

2010 – 2014

Swiss Federal Diploma in Electronics

TECHNICAL SKILLS

Full-Stack React, Next.js, TypeScript, JavaScript, Node.js, REST APIs, admin tooling, responsive UI

Data / Delivery SQL, MySQL, PocketBase, data modeling, Docker, GitHub Actions, AWS S3, Linux, Grafana

Industrial / Edge OPC UA, MQTT, physical I/O, connected machines, MES interfaces, TCP/IP, embedded-adjacent systems

Quality / Product Unit and integration testing, test automation, monitoring, production debugging, recovery, user research

Languages German (native), English (fluent), Spanish (basic)
